Interfaces

Category Name Interfaces

Actionee HAIS

Sub Category

Subject FOS/FDF Interface Requirements

Description of Problem or Suggestion:

The interface with FDF appears to be a passive arrangement where FDF sends stuff to FOS Scheduling Activities and FOS Real-Time Operations Activities sends "TLM Subsets" (CM-12) or Telemetry Parameters (JSC-20) to FDF. This does not appear to be an adequate interface. Specifically, Requirement NI-0330 was not mapped to a Level 4 requirement.

Originator's Recommendation

Add a Level 4 requirement(s) that is traced to NI-0330.

GSFC Response by:

GSFC Response Date

HAIS Response by: D. Herring

HAIS Schedule 1/13/95

HAIS R. E. B. Moore

HAIS Response Date 1/18/95

The FDF interface design is compatible with and similar to current control center /FDF interfaces in use at GSFC. The trace for NI-0330 will be updated (1/31/95) in the design specification.
